

FULL-STACK WEB DEVELOPER

DANIEL WILHELMSSEN

<http://www.danielwilhelmsen.com>

EXPERIENCE

Music Audience Exchange • 2016 – Present

Software Engineer

- Developed and maintained MAX Artist Registration, Artist Matching & Genre Matching systems using Laravel/Lumen and Backbone.js.
- Participated in developing a Node powered administration and analytic system servicing all of MAX's sites and tools.

GenArts, Inc. • 2013 – 2016

Lead Web Developer

- Developed & deployed digitalcanvas.co, as well as a website redesign for genarts.com.
- Led the web development team & pushed to improve coding standards, implement backup strategies, & incorporate efficient & effective software development practices.
- Worked on customer facing projects using technologies such as Drupal, WordPress, PHP, jQuery & Bootstrap as well as internal web-based tools built using Ruby, Rails, Perl & HAML.

Streetwise Media, LLC • 2012 – 2013

Developer

- Migrated two large sites (2 million unique visitors monthly) from WordPress to a custom built, in-house, Yii framework-based CMS.
- Led software testing & quality assurance for all products. Implemented processes for unit, acceptance, regression, & security testing.
- Developed & implemented responsive functionality into all sites, allowing for optimized performance & viewing on mobile phones & tablets.

Freelance Web Design • 2005 – Present

Web Developer, Designer & Consultant

- Developed dynamic, custom websites for business clients that maintained & enhanced brand identities while delivering improved user experiences & search engine recognition.
- Advised clients on emerging web trends & technologies, & recommended solutions based on the business' needs & budget.

Laidlaw Group, LLC • 2011 – 2012

Web Developer & Designer

- Designed & developed a web-based, WordPress driven mobile application optimized for use with iOS, Android, & Windows 7 mobile devices.
- Developed multiple CMS driven, custom e-commerce solutions for local, national, & international businesses.

D'Mention Systems, LLC • 2008 – 2011

Web Designer & Multimedia Artist

- Implemented a multi-site WordPress installation & developed a customizable theme that enabled clients to incorporate logos, custom colors, advertising & social media through a back-end interface.
- Designed & developed websites for businesses & individuals utilizing WordPress, Drupal & Joomla.
